

Free Media Movement (FMM)

The Taliban, a religious organization, is reportedly harassing journalists and media outlets when violently consolidating its power in Afghanistan. The Taliban will form a government in the next phase, and media freedom could be monopolized under a government formed by a religious organization.

Against this backdrop, the Free Media Movement extends the hand of solidarity, advocating for the 'security and freedom of all journalists in Afghanistan'. The Free Media Movement says 'the Taliban must immediately stop attacking journalists and search their homes and allow journalists to work freely without fear of violence or retaliation.'
